## EXTRA – Accessories

### Everything clean and under control

With Eltex accessories it is possible to monitor processes and maintain high quality through regular use.

## Cleaning brush RBR22

For consistent quality, we recommend regular cleaning of the bars.

### Advantages at a glance

- › permanently better discharging/charging results due to regular cleaning
- › longer life of the tips by using the brush
- › ergonomic grip
- › soft bristles that do not damage the encapsulation material

## Voltstick 109136

To check the function of the Eltex discharge components, it is recommended to use the Voltstick. This device for functional testing enables a quick and easy control of the discharging equipment.

## Electric field meter EM03

The EM03 electric field meter is a small and handy electric field meter with digital display for measuring electrostatic charges directly in volts.

The device works based on the field-mill-influence principle. The built-in microcomputer automatically converts the measured field strength over the set measuring distance (distance between measuring object and measuring electrode) into the charge in volts.

### Advantages at a glance

- › easy operation
- › integrated distance holder for exact measuring distance
- › compact design
