Never have efficiency and reliability been more important than they are now. Eltex helps you get electrostatic under full control – from start to finish. Preventing electrostatic charging means reliable processes. Whether in charging, discharging or grounding – targeted use of electrostatics guarantees process reliability. And Eltex knows what is most important, with individual, industry-specific solutions for your company that you can rely on for the long run.

A wide variety of requirements exist for efficient and sustainable charging and discharging products. Eltex has a wide variety of components in its product line which, assembled into modules, offer a solution for any problem.

With individually configurable systems, Eltex finds solutions for specific problems – however tricky they may be. From flat film production to tube and bag production. From rewinding and wrapping to cleaning, ionizing and molded part manufacturing, Eltex has it covered, and the Eltex experts develop customized solutions for you.

Eltex solutions are used in numerous industries: plastics, converting, printing, packaging, automation, chemicals, pharmaceuticals and many others.

Visit our application examples:
www.eltex.de/en/Applications

VARIO discharging products consist of a separate AC power supply unit for connecting one or more Eltex discharging components.

For the SINGLE products, the voltage generation (power supply unit) is integrated into the bar.

DISCHARGING

Discharging bars

Efficient Discharging bars providing a solution for every problem.

SMART DISCHARGING SYSTEM SDS

ionSTAR RX3

passivBAR RG52

exBAR EXR5C

Ion blower nozzles

Modular Ion blower nozzles to discharge and clean a wide variety of surfaces.

Cleaning systems

Ion blower guns

Flexible Ion blower guns are suitable for the manual cleaning tasks.

roundGUN PR36

cleanGUN PR36

Power supplies

Efficient Power supplies for the powering of discharge components.

PRO IONIZER ES61

BASE IONIZER ES60

COMPACT IONIZER ES24

PRO IONIZER EX ES61

CHARGING

Charging bars

Robust Charging bars for targeted charging.

Charging bar R130

Charging bar R120

Point charging bar R23ATR

High voltage generator

Powerful Generators for all charging applications.

POWER CHARGER PCSC with touchscreen

POWER CHARGER PCSC with membrane keypad

EXTRA

Eltex Connected Control ECC

Easy operation, clear functions

The innovative software for convenient monitoring and central control of all Eltex products with CANopen® interface. Connected devices can be grouped according to functions and machines, and their current system states can be displayed in an overview. The ECC is available in a software, built in or casing version and is our answer to your Industry 4.0 requirements.

Brackets for bars

Bracket HA01 with clamping pieces

Bracket HA02 with perforated plates
